

TEAM BUILDING & REFERRAL ENGINE (2027 PLAN)

To support the 2027 Team-Building plan, the system requires a robust Teams and Affiliate/Referral architecture. This moves the app from a simple "Booking Calendar" to a full "Franchise Management" tool.

1. REGIONAL TEAM STRUCTURE

The database needs a rigid hierarchy for teams to track the 16 target squads.

- **Regions:** Aurora, Broomfield, Centennial, Denver
- **Grade Divisions (Per Region):** 1st–4th, 5th–6th, 7th–8th, 9th–12th
- **Capacity constraint:** 12 Active Players + 1 Backup per team.
- **Volunteer constraint:** Maximum 4 volunteers per team.

2. TEAM LEADERS & COACHES (STAFF)

- **Leader Assignment:** A user (Adult) can be assigned as the Leader of a specific Team.
- **Lifecycle:**
 - *Phase 1 (Jan - Aug):* Recruiting / Community building (Managing WhatsApp, tracking leads).
 - *Phase 2 (Aug onward):* Option to convert to "Paid Coach" at \$40/hour.
- **Coach Responsibilities (If converted):**
 - Tue/Thu Team Practices
 - 1x M/W/F Skill Workout
 - Weekend Games

3. REFERRAL & PAYOUT ENGINE (THE AFFILIATE SYSTEM)

The system must track exactly *who* drove a player to officially enroll to calculate payouts.

Payout Rules:

- **Base Payout per Regular Player:** \$300 total pool.
- **If Leader recruits to their OWN team:** Leader gets the full \$300 (Technically \$200 for the team spot + \$100 referral).
- **If Leader recruits to ANOTHER team:** Recruiting Leader gets \$100. The receiving Team's Leader gets \$200.
- **If a Parent/Player refers someone:** The referring family gets \$100. The receiving Team's Leader gets \$200.
- **Exclusion:** Volunteer players do NOT trigger the \$200 Team Leader payout.

Technical Implementation:

- Every User account needs a unique `Referral_Code` or `Referral_Link`.
- During checkout (especially during the July Pricing Window), the system logs the `Referred_By_User_ID`.

- An admin dashboard is required to tally these payouts so the business can issue the checks/credits to the Leaders and Families in August once enrollments are locked.
